16. Other : Public Complaint	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

**Purpose of Inspection:**

Received a report that this quarry was now active, after a long period of inactivity. Also checked out a public complaint that the operator's trucks were tearing up the access road into the site.

**Inspection Summary:**

There was no equipment around the quarry at the time of my visit. There was a pick-up parked in the quarry, but no sign of the owner.

Inspection Date: June 21, 2005; Report Date: June 27, 2005  
Page 2 of 2  
S/053/012

There has been quite a bit of material removed from the quarry since my last visit, but the footprint of the site has not expanded. Most of the loose material that existed at the quarry for some time had been removed. There is evidence that some drilling and blasting had taken place in portions of the quarry.

16. The quarry was left in a stable condition, with no environmental concerns. I could not see where the operation of the quarry had had any lasting effect on the access road.

**Directions to the site:**

See previous inspection memos.
